nazara symbols.		\vee \vee \vee
Signal word:	Danger	
Hazard statements:	H272	May intensify fire; oxidiser
	H314:	Causes severe skin burns and eye damage
	H400:	Very toxic to aquatic life
	H302:	Harmful if swallowed.
	H335+H336:	May cause respiratory irritation. May cause drowsiness or dizziness
	EUH031:	Contact with acids liberates toxic gas.
	EUH2026:	Warning! Do not use together with other products. May release dangerous gases
		(chlorine)
Precautionary statemen	ts: P102	Keep out of reach of children
	P305+351+338	IF IN EYES: Rinse continuously with water for several minutes. Remove contact
		lenses if present and easy to do – continue rinsing
	P280	Wear protective gloves/protective clothing/eye protection/face protection
	P309+P310	IF exposed or If you feel unwell : Call a POISON CENTER or doctor/physician.
	P405	Store locked up
	P501	Dispose of contents/container in accordance with national regulations.

2. Hazard Identification

Hazardous components which must be listed on the label

Calcium Hypochlorite

2.3 Other Hazards

Use biocides safely. Always read the label and product information before use.

3. Composition/information on ingredients

3.2 Mixtures	Calcium Hy	pochlorite		
Chemical Name	%	CAS No	ENICS No	R/H Phrases
Calcium Hypochlorite	70 - 100%	7778-54-3	231-908-7	H272, H302, H314, H400

4. First Aid measures 4.1 Description of first aid measures IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to IF IN EYES: do so. Continue rinsing. IF SWALLOWED: Rinse mouth. Do NOT induce vomiting Get medical advice/attention 4.2 Most important symptoms and effects, both acute and delayed Symptoms and effects: - Can cause damage to the eyes and skin - Prolonged skin or eye contact may cause chemical burns - In cases of severe exposure, breathing difficulty may develop

4.3 Indication of immediate medical attention and special treatment needed

Treat symptomatically

5. Fire fighting measures

Treatment

5.1 Extinguishing media:

- In case of fire: use carbon dioxide for extinction
- DO NOT USE dry extinguishers containing ammonium compounds such as dry powder

5.2 Special hazards arising from the substance or mixture

Calcium Hypochlorite is both a strong oxidiser and is chemically reactive with many substances. Strong oxidisers are capable of intensifying a fire once started; because of this any contamination of the product with other substances by spill or otherwise should be avoided.

- Gives off irritating or toxic fumes (or gases) in a fire.
- Exposure to decomposition products may be a hazard to health
- See Section 10.6

5.3 Advice for fire-fighters

- Wear protective clothing as per section 8
- Wear self-contained breathing apparatus (SCBA). Wear full protective clothing including chemical protection suit
- In case of fire: Evacuate area. Fight fire remotely due to the risk of explosion

6. Accidental release Measures

6.1 Personal precautions, protective equipment and emergency procedures

- Wear protective clothing as per section 8
- Evacuate the area and keep personnel upwind
- Avoid raising dust
- Avoid contact with combustible material

6.2 Environmental precautions

- Avoid release to the environment. Do not allow to enter public sewers and watercourses
- If contamination of drainage systems or water courses is unavoidable, immediately inform appropriate authorities

6.3 Methods and materials for containment and cleaning up

- Place in appropriate container
- Seal containers and label them
- Remove contaminated material to safe location for subsequent disposal
- Do not absorb spillage in sawdust or other combustible material
- Ventilate the area and wash spill site after material pick-up is complete

6.4 Reference to other sections

See Section 1 for emergency contact information See Section 7 & 8 for information on Personal protective equipment See section 13 for waste treatment information

7. Handling and storage

7.1 Precautions for safe handling

- Do not mix with any other products
- Ensure adequate ventilation
- Avoid contact with skin and eyes.
- Avoid breathing dust/fume/gas/mist/vapours/spray.
- Do not eat, drink or smoke when using this product
- Wash thoroughly after handling.

7.2 Conditions for safe storage, including any incompatibilities.

- Store away from other materials.
- Keep only in original container
- Store in a dry place and protect from moisture.
- Store in a well-ventilated place. Keep cool.
- Do not store above 35 °C
- Keep away from foodstuff.
- Keep away from acid and reducing agents

7.3 Specific end uses

- No information available

8. Exposure control/personal protection

8.1 Control parameters

Calcium hypochlorite

- WEL (short term) 2 mg/m3

8.2 Exposure controls

- Engineering controls should be provided which maintain airborne concentrations below the relevant guidelines

Personal protective equipment

- In case of inadequate ventilation wear respiratory protection

- Wear protective gloves. The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and standard EN 374.
- Wear safety glasses approved to standard EN 166.
- Wear apron or other light protective clothing

9. Physical and chemical properties

9.1 Information on basic physical and chemical properties

- Appearance: white, granules
- Odour: chlorine
- pH 12 at 1 % concentration
- Boiling point not known
- Vapour pressure not applicable
- Vapour density not applicable
- Melting point 180° C with decomposition
- Water solubility 217 g/l at 27 °C
- Specific gravity not known
- Flash point not known
- Strong oxidising agent
- Partition coefficient:n-Octanol/water not known
- Evaporation rate -not known
- Viscosity not applicable

9.2 Other Information

- No information available

10. Stability and reactivity

10.1 Reactivity

- Strong oxidising agent
- Use with other products may release Chlorine

10.2 Chemical stability

- Decomposes above 180 °C

10.3 Possibility of hazardous reactions

- Contact with acids liberates toxic gas
- Exothermic reaction on heating

10.4 Conditions to avoid

- Keep away from heat and moisture
- Prevent ingress of humidity and moisture into container or package. Always close the lid after use.
- Avoid contact with combustible material
- Avoid contact with foodstuffs

10.5 Incompatible materials

- Reacts with acids to produce free chlorine
- Incompatible with reducing agents
- Incompatible with metals
- Incompatible with strong oxidizing substances
- Ammonia

10.6 Hazardous decomposition products

- Decomposition products may include acidic and toxic gases
- Decomposition products may include oxygen
- Decomposition products may include chlorine
- Decomposition products may include carbonoxides

Trade Name: RockWaterAir Rapid Shock Chlorine Oxidiser Granules

11. Toxilogical Information

11.1 Information on toxilogical effects

- LD50 (oral,rat) 790 mg/kg
- Prolonged skin or eye contact may cause chemical burns

Inhalation	 May cause respiratory trac tirritation. Causes delayed pulmonary oedema
Contact with skin	 Causes blistering of the skin Causes redness and irritation Can cause damage to the mucous membranes
Contact with eyes	 Causes redness and swelling Causes burning sensation Can cause damage to the eyes
Ingestion	 The ingestion of significant quantities may cause burning sensation The ingestion of significant quantities may cause damage to the digestive system
Carcinogenicity Teratogenicity Mutagenicity	 No evidence of carcinogenic effects No information available No information available

12. Ecological Information

12.1 Toxicity

- Very toxic to aquatic life
- LC50 (bluegillsunfish) 0.088mg/l (96hr)
- LC50 (rainbowtrout) 0.16mg/l (96hr)
- EC50 (Daphniamagna) 0.116mg/l (48hr)

12.2 Persistence and degradability

Persistence and degradability - No information available

	Bioaccumlative potential Partition coefficient:	- No information available
	Mobility in soil Mobility	 This substance is poorly absorbed onto soils or sediments Large volumes may penetrate soil and contaminate groundwater
12.5	Results of PBT and PvB ass	essment
	Results of PBT and PvB ass PBT identification:	essment - Not a PBT according to REACH Annex XIII

13. Disposal Considerations

13.1 Waste treatment methods

- Disposal should be in accordance with local, state or national legislation
- Avoid release to the environment
- Do not allow to enter public sewers and water coursest
- This material and/or its container must be disposed of as hazardous waste
- Do not reuse empty containers without commercial cleaning or reconditioning

13. Disposal Considerations

13.1 Classification

Waste Codes in accordance with the European Waste catalogue (EWC) are origin-defined. Since this product is used in several industries, no Waste Code can be provided by the supplier. The Waste Code should be determined in arrangement with your waste disposal partner or the responsible authority

15. Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for this substance or mixture. This Safety Data Sheet is provided in compliance with REACH Regulation (EC) No 1907/2006

15.2 Chemical Safety Assessment

No data available

Trade Name: RockWaterAir Rapid Shock Chlorine Oxidiser Granules

16. Other information

Full text of H-statements referred to under sections 2 and 3 H272: May intensify fire; oxidizer. H302: Harmful if swallowed.; H314: Causes severe skin burns and eye damage.

H400: Very toxic to aquatic life.
