

# Solar Shower

Perfect for around the pool

- **Eco friendly**

Soaks up and stores the sun's energy, no electricity ever needed. Water heats up in as little as an hour. Water is heated by solar power in the integral collector tanks.

- **Simple setup**

Perfect for the pool or patio area, securely mounts to any flat surface. No plumbing or expensive installation required.

- **Unique features**

Hot/cold temperature controls. Constructed of weather-proof, non-corrosive materials. Single cold water feed, simple to connect to a standard garden hose.

- **Keep your pool water clean**

No more lotions, cosmetics, sand, dirt, grass and other contaminants being introduced to the pool water by bathers.
