

## Blue Horizons Ultimate Phos Granules

### Key Features/Characteristics

- 🔑 Highly concentrated granular phosphate remover
- 🔑 Easy to dose twin sachet
- 🔑 Fewer algae problems
- 🔑 Less cleaning & vacuuming

Rapid dissolving Blue Horizons Ultimate Phos Granules helps eliminate phosphates from your pool thereby removing a food source for algae growth.

### Application Instructions

1. If pool has algae, follow normal procedures to cure.
2. Check the pH level and if necessary adjust to the desired range 7.2 – 7.6.
3. Backwash/clean the filter if necessary.
4. Cut open the sachet and pour the whole contents directly into the skimmer or directly to the pool over the water inlets to aid distribution.
5. Run filter for a minimum of 24 hours after product application.
6. Check the filter pressure and backwash if necessary.
7. Re-test phosphate levels 48 hours after application.

Dose Rates					
Water Volumes		Phosphate levels			
Litres	Gallons	Routine (250ppb)	1,000ppb (1mg/l)	2,500ppb (2.5mg/l)	5,000ppb (5.0mg/l)
4,546	1,000	2g	11g	29g	60g
22,730	5,000	8g	54g	145g	298g
45,460	10,000	15g	107g	290g	595g
68,190	15,000	23g	160g	435g	893g

ppb = parts per billion

**Note:** A regular maintenance dose of Ultimate Phos Granules is recommended to keep phosphate levels under 250ppb (0.25mg/l)
