

# AquaSParkle

## Eco Flush

### Key Features

- Keeps hot tub 'plumbing' clean
- Suitable for hot tubs and whirlpool baths
- Rapidly removes soap and oil build-up

AquaSParkle Eco Flush has been formulated to help remove soap and oil deposits from hot tub and whirlpool bath plumbing.

### Hot Tub Application Instructions

1. Remove the cartridge filter(s) and ensure you have a residual disinfectant level of 3 – 5mg/l (ppm).
2. Add the required dose directly into the hot tub whilst the pump(s) are turned on (with air controls closed) to assist product distribution.
3. Allow to circulate for 1 hour, then drain the tub, rinse any residues to waste, then refill with clean fresh water.

Hot Tub Dose Rates		
Litres	Gallons	Dose rate
1,000	220	250ml
1,500	330	375ml

### Whirlpool Bath Application Instructions

1. Fill bath with warm water ensuring all jets are submerged.
2. Carefully add a small amount of domestic bleach (a capful) to the bath water and circulate.
3. Add 150ml of AquaSParkle Eco Flush to the water and circulate.
4. Drain the bath, rinse residues off surfaces and refill with fresh water.
5. Repeat monthly, or as and when required.
