

REMORA ICE

Cold and Warm Water Therapy

automatedenvironmentalsystems.co.uk

Outstanding performance

The Remora Ice offers an unparalleled cold and warm water therapy experience.

After a workout, the Remora Ice provides you with a personal recovery experience, the deep, ergonomic design provides plenty of room and the jets circulate the water to remove any thermal barrier.

Alternatively if you are looking to unwind after a stressful day you can simply switch to heating mode and enjoy your very own warm water therapy complete with massage jets and relaxing LED lighting.

From the maintenance-free cabinet with stylish LED corner lighting, to the built-in ozone filtration, the Remora Ice offers a unique one person spa experience.

The insulated cover helps to maintain your selected temperature, while keeping the water free of debris when not in use.

World class acrylic shell

The Remora Ice has a stainless steel frame for strength and rigidity, while the Aristech acrylic shell is renowned for its exceptional durability and luxury finish.

The Remora Ice holds 700 litres of water, is easily filled with a hose, while the built-in drain port simplifies emptying when you need to change the water.

Up to 75% less energy

Thanks to the addition of a built-in heat pump, the Remora Ice chills and heats, reducing energy consumption by up to 75% compared to standard in-line heaters.

The Remora Ice combines a chiller function down to 5°C and a heating function with temperatures up to 40°C, giving you a unique experience where you can enjoy the benefits of both cold and warm water therapy in one unit.

The Remora Ice comes pre-fitted with a mains cable and UK plug making installation quick and simple, simply fill the unit with water, insert the supplied cartridge filter, plug in and select your temperature.

Remora Ice are backed by a two year warranty and a total seven year parts warranty on the compressor and heat exchanger.

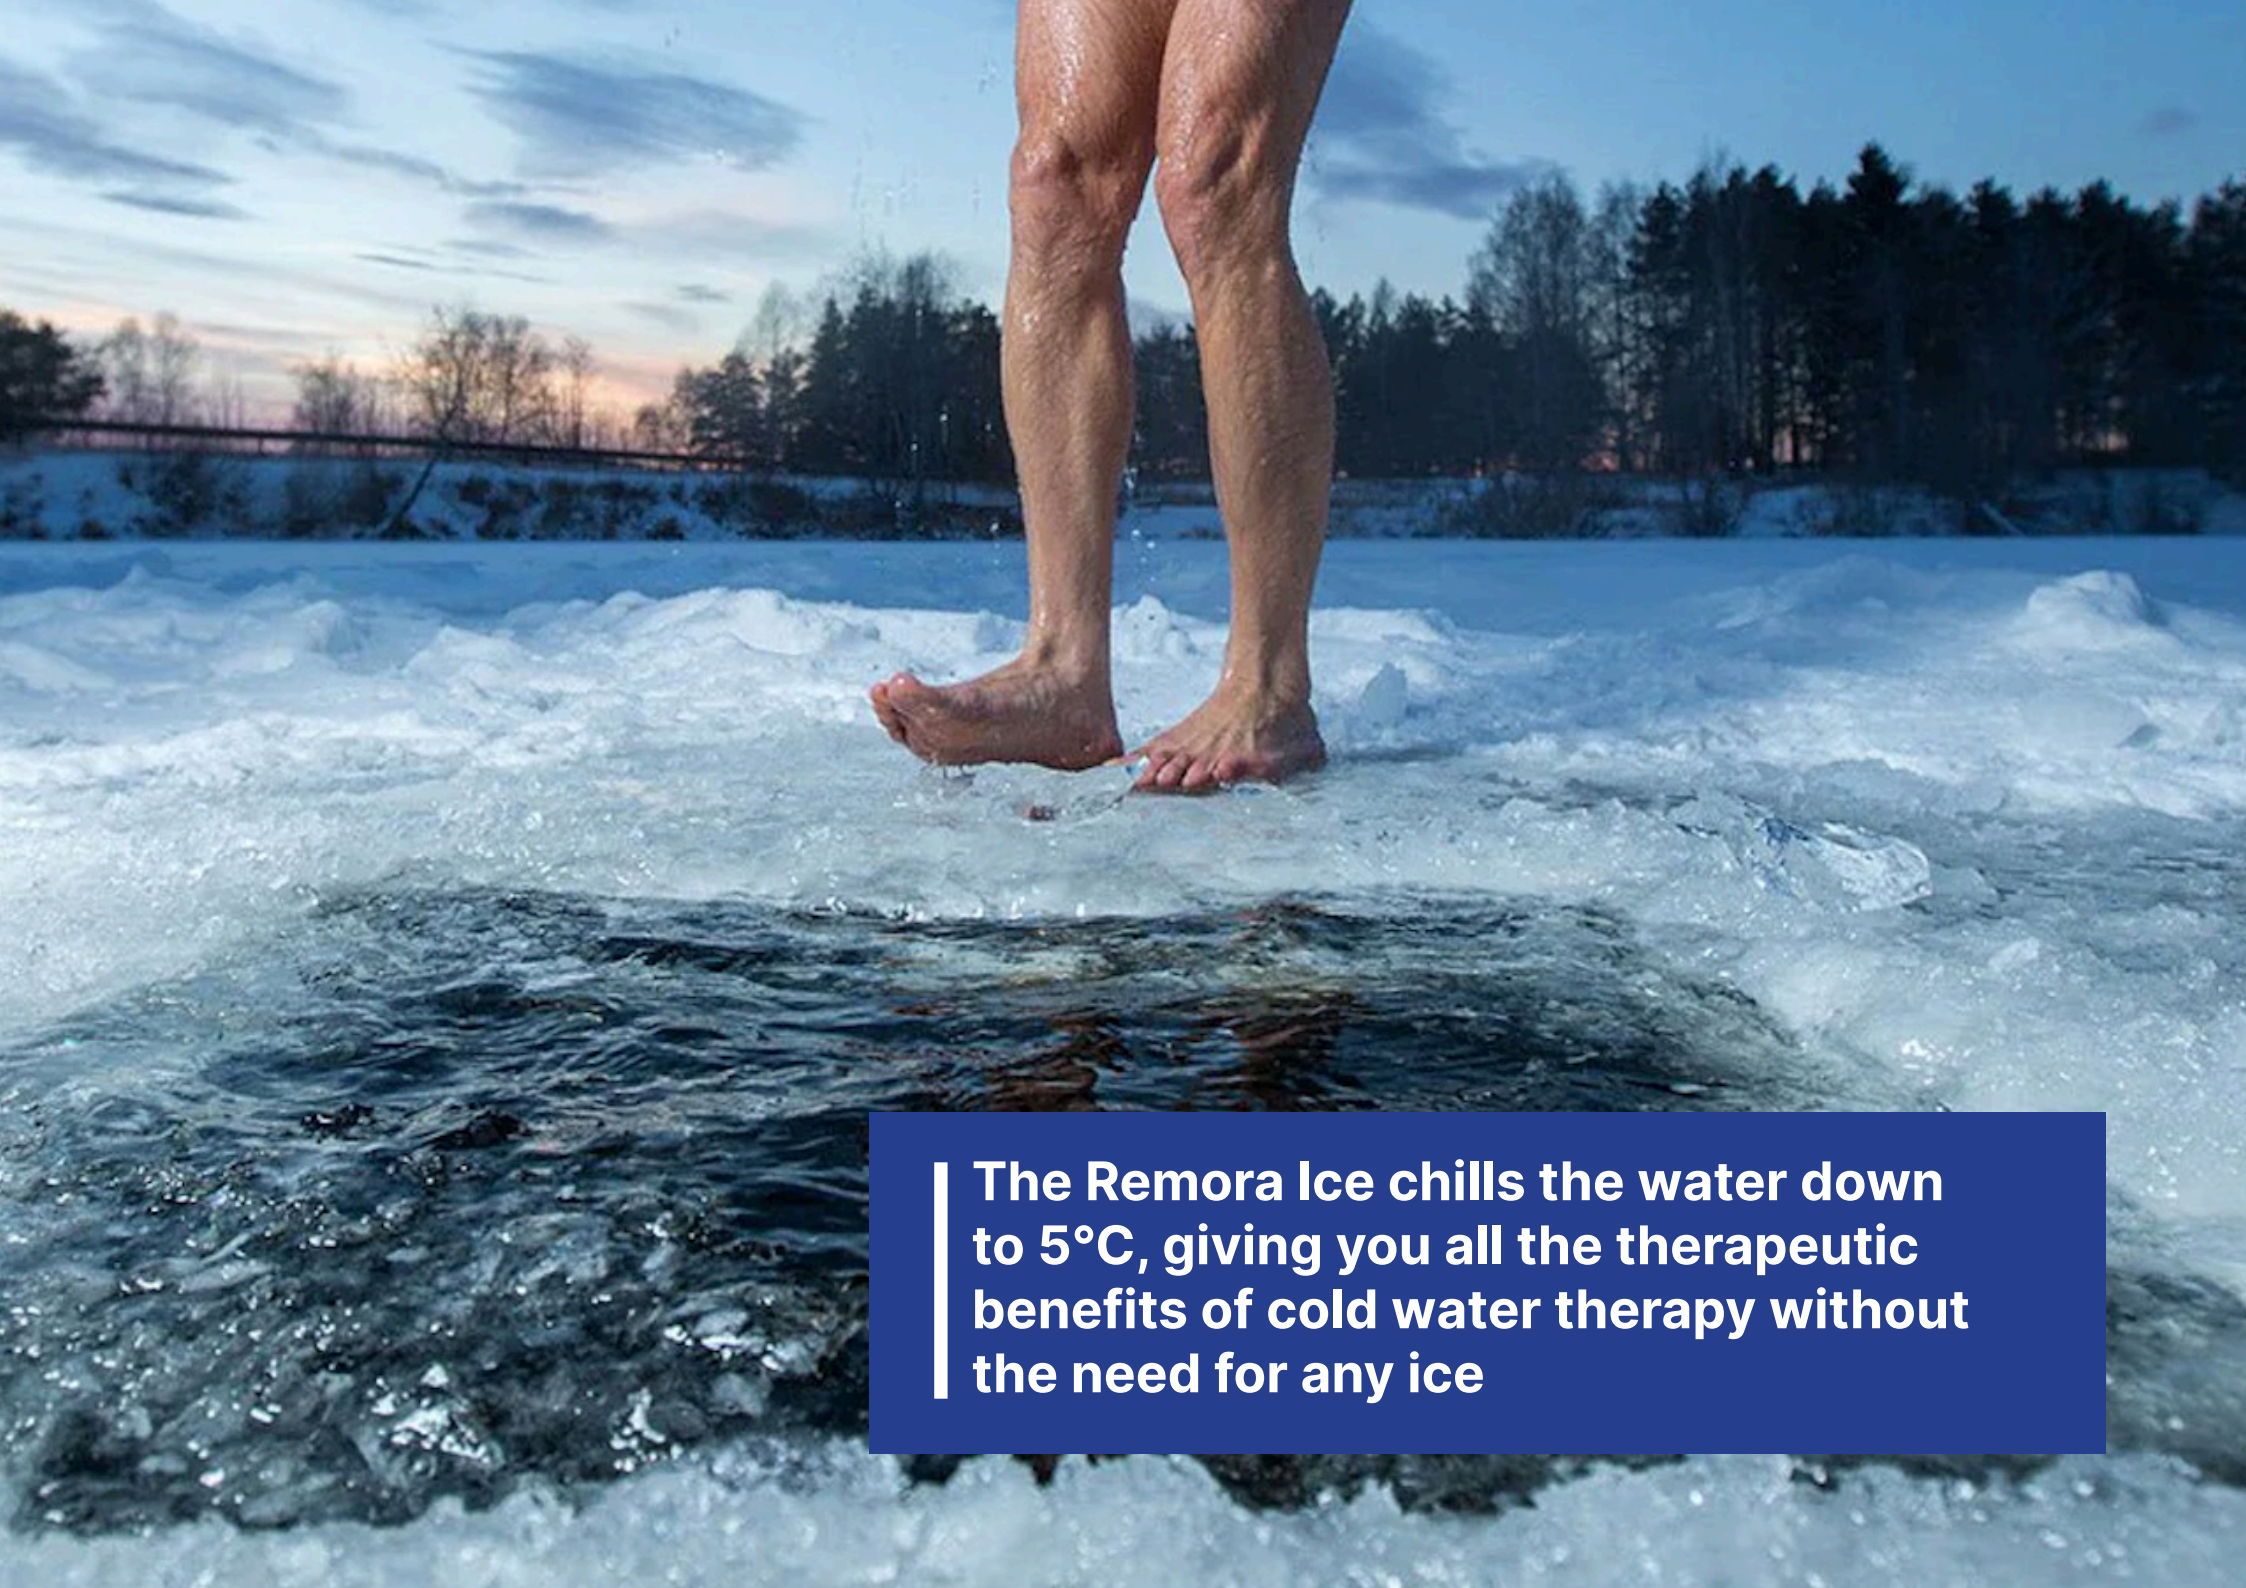

Ozone water purification reduces the need for chemicals giving you crystal clear water by oxygenating and cycling the water through the easy access filter housing

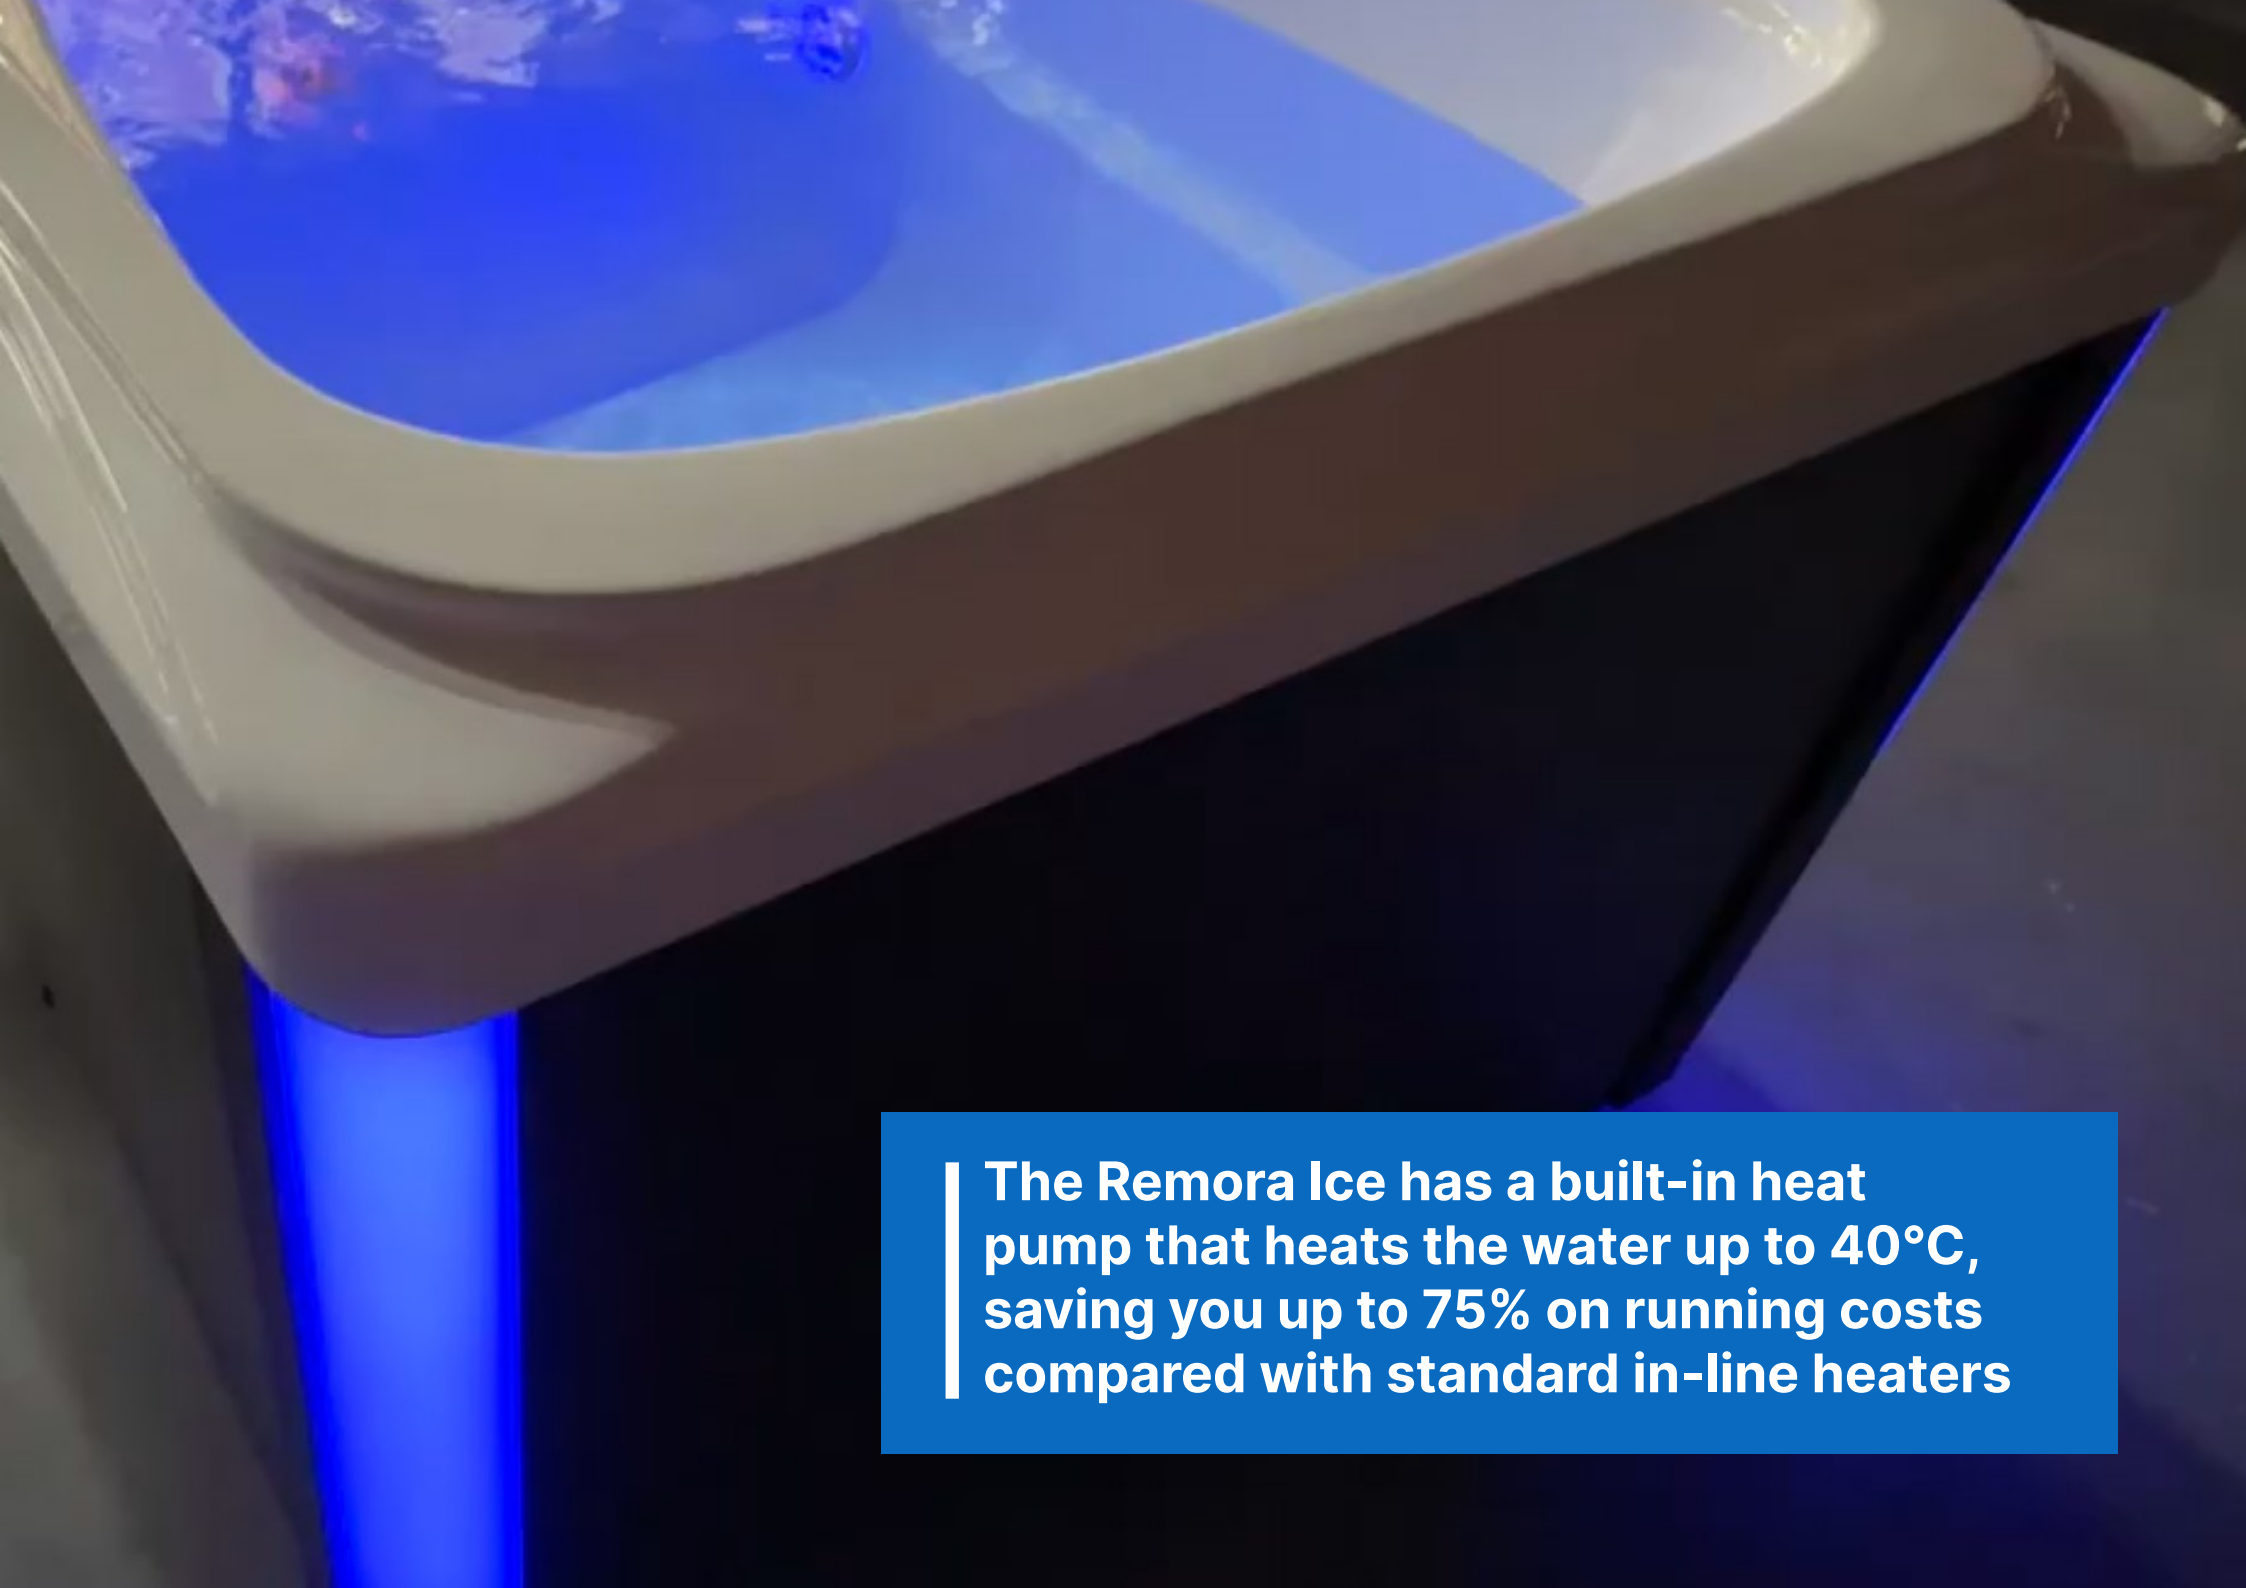

- ▶ Temperature to as Low as 5°C: Enjoy consistent cold water therapy without the need for additional ice
- ▶ Use your spa as a hot tub: warm water therapy, with temperatures up to 40°C, complete with massage jets
- ▶ Integrated heat pump: Built directly into the tub for efficient cooling and heating, consistent temperatures, and save up to 75% on energy compared with standard chiller/heater
- ▶ Ozone & UV Purification System: Ensures clean, clear water 24/7 while reducing the need for additional chemicals (chiller function only)
- ▶ Exterior & Interior Lighting: Aesthetic and functional LED lighting adds a modern touch and enhances usability
- ▶ Recovery-Focused Design: Reduces soreness, boosts circulation, and promotes faster muscle recovery
- ▶ Energy & Mood Enhancer: Stimulates endorphins and relieves stress for a refreshing and invigorating experience
- ▶ Encourages Quality Sleep: A natural temperature drop helps trigger melatonin release for better sleep
- ▶ Folding spa cover included as standard
- ▶ Wi-Fi control via Smart Life App

The Remora Ice chills the water down to 5°C, giving you all the therapeutic benefits of cold water therapy without the need for any ice

Benefits of Cold Water Therapy

- Reduces muscle soreness by improving circulation and decreasing inflammation
 - Enhances athletic recovery and reduces the risk of injury
 - Boosts metabolism and supports weight loss
-
- Reduces stress by adapting your body to the natural stress response
 - Elevates mood through the release of endorphins
 - Enhances focus, mental clarity, and resilience
 - Promotes better sleep by regulating your body's temperature cycle

The Remora Ice has a built-in heat pump that heats the water up to 40°C, saving you up to 75% on running costs compared with standard in-line heaters

Benefits of Warm Water Therapy

- Thermal massage provides relief from aches and pains
 - Warm water therapy can help you relax, unwind, and destress
 - Soaking in warm water before bed leads to deeper, more restful, and more continuous sleep
-
- Just 20 minutes immersed in warm water at around 37°C dilates your blood vessels and improves circulation
 - Relaxing in a hot tub is proven to provide temporary relief from arthritic joint pain
 - The heat raises your heart rate, which helps both regulate and lower blood pressure and maintain healthy blood flow
