Blue Horizons Rapid Dissolving Chlorine Stabiliser

Blue Horizons Rapid Dissolving Chlorine Stabiliser prevents chlorine loss to sunlight. This is especially useful where an unstabilised chlorine product is being used.

Ideal Stabiliser Range: 30 – 60mg/l

APPLICATION INSTRUCTIONS

1. Maintain pH level within the ideal range of 7.2 – 7.6. If the not in this range, adjust. Test the stabiliser (cyanuric acid) level before aiming for the ideal range.
2. Backwash your filter prior to application.
3. Pre-dissolve this product in a clean plastic container at a maximum rate of 100g of product per 2.2 gallons (10lts) in warm water. Stir well to ensure product is fully dissolved. Add the resulting solution to the pool whilst the pump(s) are turned 'on' preferably near the water inlets to aid distribution.
4. Repeat dose application if necessary to achieve ideal stabiliser range above.

Water Volumes		Dose Rates	
		To increase Stabiliser Level	
Litres	Gallons	10 mg/l	30 mg/l
4,545	1,000	45g	135g
11,360	2,500	113g	338g
22,700	5,000	225g	675g
45,450	10,000	450g	1.35kg
68,175	15,000	675g	2.025kg
