chemical brand

## Blue Horizons Stain & Scale Inhibitor

Stain and Scale Inhibitor will help prevent and/or remove unsightly metal or other staining (e.g. from leaves) and also control and/or remove scale.

### APPLICATION INSTRUCTIONS

1. **Important:** Before using this product, ensure that sanitiser levels are not greater than 3mg/l (ppm) for product effectiveness.
2. Backwash the filter before application.
  1. Apply the product as close to the stain/scale as possible with the pool filtration system turned off.
  2. Brush the stain and scale daily for 5 – 7 days following treatment.
3. Repeat the treatment for large heavily stained areas, but do not exceed the dose of 3 litres per 45,450 litres (10,000 gallons) of pool water.

Water Volumes		Dose Rates		
		Scale/Stain Prevention		Stain/Scale Removal
