

PRODUCT ENHANCEMENT ALERT

IMPORTANT! We have made changes to the Adjustable Mini Jet that may affect your installation.

Beginning December 1st, 2005, Waterway will be making an improvement to our Adjustable Mini Jets that will not be interchangeable with your current inventory. For new installations, the new bodies must be used with the new internals. Any old style jet bodies that are left over in your inventory or are already installed on a tub can be used simply by exchanging the old nozzle assembly in the jet bodies with the new one. For replacements in the field, the new internals should be sent with the new nozzle assemblies. The internals can be used as a wrench to remove the corresponding nozzle assemblies from the bodies. Internals being sold without bodies will temporarily be supplied with the new nozzle assemblies to assist you with the change. Attached is a list of assembly numbers affected by the change. We are only offering the new nozzle at no charge on a temporary basis due to the changes that have been made. Please inform your production department of these changes being made.

Nozzle Assembly Part Numbers:

212-0880 5/16" Nozzle Assembly

212-0890 1/4" Nozzle Assembly
