

Tiled Spas, Swimspas & Vitality Spas

A close-up, profile view of a woman with dark hair, eyes closed, and a serene expression, relaxing in a hot tub. Bubbles are visible around her head and shoulders, and water droplets are on her skin.

Introduction

About Certikin

Certikin is the leading supplier of wet leisure and water treatment equipment in the UK and has been established for over 50 years. The Certikin brand is synonymous with premium quality.

Certikin International Ltd has branches in Witney, Oxfordshire and in Leeds, West Yorkshire and employs a workforce of over 100 people. We hold in stock over 8,000 product lines for both domestic and commercial wet leisure applications. Our range includes wellness, spas, water park slides and play equipment as well as a huge range of products for both the new build and retro-fit swimming pool and wellness markets.

We have a gold plated reputation for selling market leading products backed by superb technical support. Our partners include world famous names such as Fluvo, Calorex, CalderaSpas, Coverstar and Roldeck.

Certikin Tiled Spas

We have a range of tiled spas for both domestic and commercial installations, including swimspas, Vitality spas and plunge pools. We work very closely with the manufacturing team to ensure that the product that we provide is top quality and made exactly to your specification.

A tiled spa is a hard wearing yet luxurious solution for hotels, leisure clubs and homes alike. The tiled finish is second to none and gives you a long lasting product that will look good for many years to come.

British Made

Our tiled spa range is manufactured in the North of England by our experienced team of spa professionals, and are delivered to you ready-tiled for a quick installation.

Quality

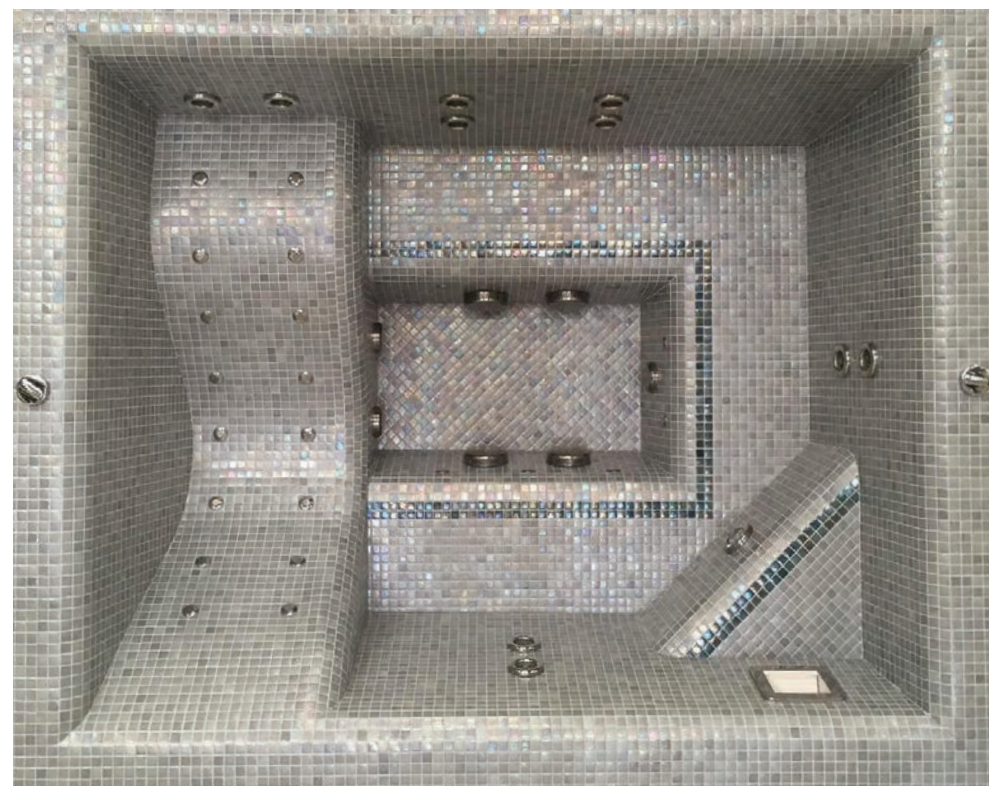

These spas are manufactured with a reinforced, fully insulated fibreglass shell with stainless steel or chrome fittings finished in your choice of tile. They are delivered to you ready for installation with a stainless steel self support leg frame with adjustable feet. A thorough quality and testing procedure is adhered to throughout the manufacturing process.

Access all areas

Our tiled spa range can be supplied in sections ready to be joined on site by our experienced technician giving you the ultimate flexibility where access on site is difficult.

Bespoke Designs

In addition to the standard tiled spa range, we can manufacture bespoke products to your design and requirements. Whatever shape, size and depth you need, speak to our technical team who will be happy to offer assistance and provide a quotation. Spas can also be customised with the addition of fluvo features such as air pads, cannons and water curtains. Upgraded grating for the spa surround and pits for automatic covers can also be incorporated into the design.

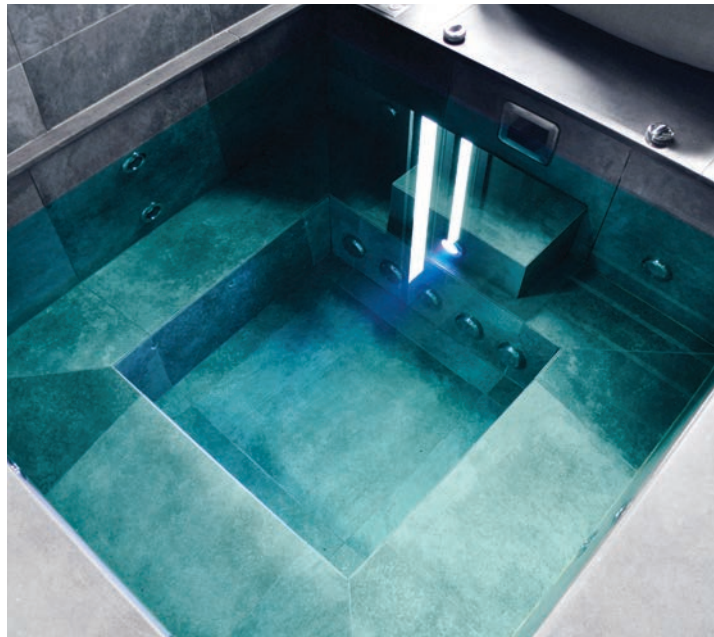

Skimmer Spas

Primarily used in the domestic market, skimmer spas have a freeboard above the waterline where the skimmer is incorporated. Available in a nine different shapes and sizes and can be customised if required.

Standard Configuration

- Chrome and stainless steel fittings
- Underwater LED light (white or colour change)
- Automatic top up connection
- Piezo or air switches
- Multiple jet configuration
- Air nozzles
- Stainless steel leg kit
- Fully insulated shell

Model	Size (mm)	Seats	Water Jets	Air Jets	Lounger
Round 2m	2000 dia x 1100	4	8	8	N/A
Round 2.2m	2200 dia x 1100	5	10	10	N/A
Round 2.4m	2400 x 1100	5	10	10	N/A
Square 2m	2000 x 2000 x 1100	4	8	8	N/A
Square 2.2m	2200 x 2200 x 1100	4	8	8	N/A
Square 2.4m	2400 x 2400 x 1100	4/8	8	8	N/A
Octagon 2.25m	2150 x 2150 x 1100	7	14	10	N/A
Oval 3m	3000 x 2000 x 1100	7	14	10	N/A
Rectangle 2.2m	2200 x 1800 x 1100	4	8	8	1

Overflow Spas

Overflow spas are most often used in commercial applications due to their ability to cope with higher numbers of bathers. These spas have a grated area surrounding the main body where the water flows into the grating and then into a balance tank.

Standard Configuration

- Chrome and stainless steel fittings
- Underwater LED light (white or colour change)
- Automatic top up connection
- Piezo or air switches
- Multiple jet configuration
- Air nozzles
- Stainless steel leg kit
- Fully insulated shell
- Overflow grating

Vitality 4m	4000 x 3500 x 1000	4	3	8	8
Vitality 4.5m	4500 x 3000 x 1350	4	2	8	8
Vitality 5.5m	5500 x 3000 x 1350	4	2	8	8
Vitality 5.5m	5500 x 4300 x 1350	6	4	12	10
Vitality 7.5m	7500 x 4300 x 1350	6	4	12	10

Bespoke Design

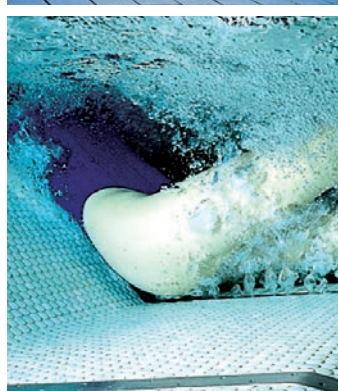

Bespoke sizes are available for spas, swimspas and vitality spas. Both skimmer and overflow systems can be accommodated.

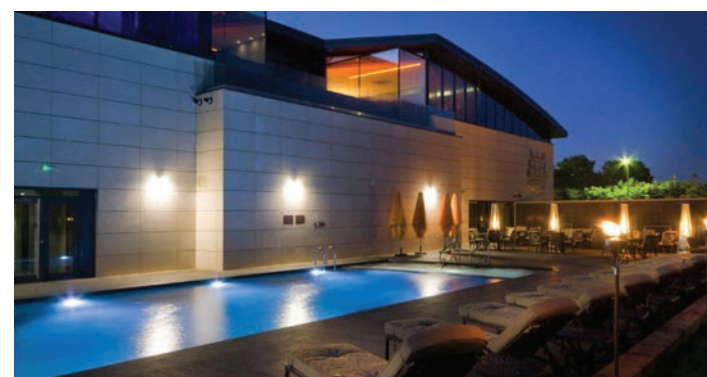

We have a multitude of fluvo water features that can be incorporated into our tiled spa range such as air pads and hydromassage jets as well as handrails, water cannons and water curtains.

We can incorporate pits for automatic covers and extended lips on the spas for above finished floor level applications. We can even split the spas into segments if needed making them easier to transport and to position on site if access is limited. The sections are then joined on site and the joint tiled over by highly experienced engineers.

Grating can be manufactured for overflow spas in a wide choice of styles and colours to complement the tile choice and surrounding area finishes.

We can work with you to design your spa to give you the features that you want and the size and look that you want. Please contact our Technical Sales Team on 01993 777200 or email info@certikin.co.uk for advice and quotations for bespoke products.

Plunge Pools

A Plunge Pool is a small pool usually used for cooling off after heat treatments such as sauna or steam sessions. The water is typically between 5-10 degrees, achieved with the use of a chiller.

Dimensions – 2132mm x 2075mm
x 1370mm

Plunge Pools

Plunge Pool

A wealth of features

Spa fittings

All spas, swimspas and vitality spas are fitted with standard jet and fittings arrangements. Additional fittings can be added and the location of fittings can be altered to your preference. Jets, suctions, skimmers and inlets all come complete with stainless steel or chrome faceplates to give a sleek finish.

Lighting

LED white or colour change lighting is standard on all spas, swimspas and vitality spas. The colour change lights can be controlled using a remote control to alternate between six set colours and six sequences.

Tiles

The possibilities for tiles are endless. Included in the price is a standard range of tiles from a variety of tile manufacturers in popular colours. Our spas can be tiled in anything from 15mm mosaic to large format tiles and even pebbles can be used. If you prefer something that is not standard, then this can be arranged too. You can even provide your own tiles if you would prefer, though we would need to ensure that they are suitable for the product that you order prior to starting manufacture.

Calorex Dehumidification

Indoor installations require a dehumidifier, individually sized to suit the spa and the location, speak to our Technical Sales Team for a quotation.

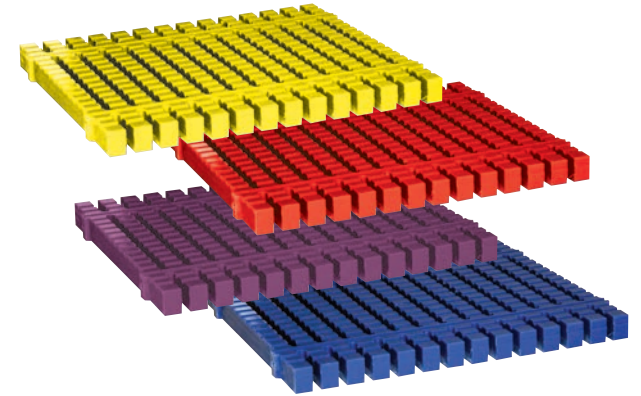

Water Treatment

CertiDos chemical dosing systems keep water clean and healthy. Each system is sized depending on the capacity, the expected bathing load and the type of chemicals that you wish to use.

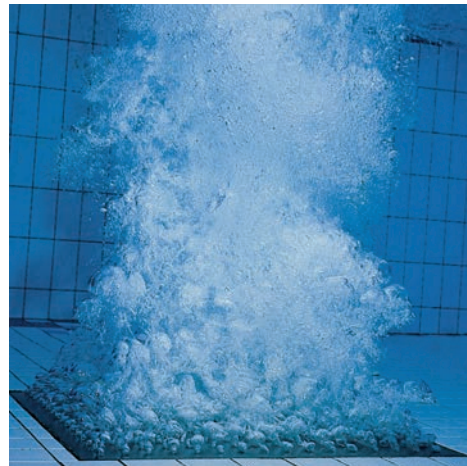

Filtration Systems

We can offer standard and bespoke filtration for your spa, vitality spa or swimspa. Standard filtration includes sand or cartridge filter, circulation and booster pumps, electric heater or heat exchanger, air blower, chemical dosing and control panel.

HDPE Grating

Bespoke grating can be made for overflow spas and Vitality spas in a choice of styles and colours.

Water Features

A variety of water features, such as air pads and cannons can be incorporated into the complete range.
